Description and Current Status

Prince George Fire and EMS request permission to apply for the 2020 Assistance to Firefighter Grant through the Federal Emergency Management Agency. Prince George Fire and EMS conducted an SCBA overhaul in 2004. Several packs were replaced and brought up to the 2002 standards. Since then, several changes have taken place making our current cache obsolete. The current low pressure systems are no longer acceptable. The current standard calls for high pressure systems. Therefore, recently purchased SCBA's are now mixing with obsolete SCBA's creating the potential for mix parts and accessories which could lead to a potential catastrophic failure of SCBA's resulting in firefighter deaths or injuries. Additionally, a failure could result in the inability to perform lifesaving rescues, save citizens property and protect the environment.

Fire and EMS is in need of replacing the out dated SCBA's that our firefighters are utilizing to enter hazardous environment when protecting our citizens. The current SCBA's are 4 standards out dated. The project calls for SCBA's that meet current standards and incorporate new technology to ensure the safety of our first responders is protected.

The total estimated cost of the project is \$1,080,000.00. The AFG Grant requires a 10% cost match for jurisdictions of our size. Therefore, if awarded, the County will be required to contribute \$108,000.00 towards the project.
