

Emergency Crew – Electrical Upgrades

Prepared by Dean Simmons, Director of General Services

Status Report:

General Services received a Feasibility Study by DJG Architects to perform Electrical Upgrades to the Emergency Crew – Station 8 facility.

Plans were prepared by DJG Architects for construction and a quote was received to perform all electrical upgrades at a cost of \$120,428.00.

A Cost Savings of \$13,500 can be utilized by using Aluminum Service Wiring and value engineered Light Fixtures. This will be used to cover other costs not included in Quote, to upgrade propane tank for added required capacity and electrical service to 3-Phase if required.

This project will be added as an Agenda Item to the April 12, 2022 Board of Supervisors Meeting for authorization to proceed with final cost.
